SKILLS

AI & LLMs: Python, LLMs, Agentic AI, RAG, LangChain, LangGraph, Claude, Hugging Face, AI/ML

AI Engineering: LLM Integration, Multi-Stage Workflows, Map-Reduce, Prompt Pipelines, AI Image Detection, AI Image Verification

Backend & Data: Node.js, FastAPI, REST APIs, WebSockets, PostgreSQL, MySQL, Redis, Redis Streams

Engineering: JavaScript, TypeScript, SQL, React, Docker, AWS, GCP, System Design, DSA

ACHIEVEMENTS

- Demonstrated advanced Data Structures & Algorithms proficiency by achieving **LeetCode Knight** (2,012 Rating), ranked in the top **2.45%** globally with **1K+** solved problems.
- Developed and shipped Android applications, achieving over **1.4M+ Play Store downloads**.
- Published open-source **npm libraries** with **4.6K+** downloads.
- Selected as a **HackWithInfy Finalist**, and one of 150 builders chosen from 5K+ applicants at **Push to Prod 2026**, an Anthropic Claude hackathon.

EXPERIENCE

Infosys | *Specialist Programmer – Software Development Engineer*

Aug 2024 – Present

- Developed an **AI-powered PDD generation platform** transforming meeting transcripts and videos into structured Process Design Documents, reducing creation time from hours or days to under **5 minutes**.
- Built a reusable React dashboard export library adopted across 7+ projects by 3 teams, reducing manual report creation from hours to one click.
- Led system design for micro-frontend applications using React and Webpack Module Federation.
- Optimized MySQL queries and implemented database indexing, reducing API response times by **25%**.

SaralTech | *Software Engineer Intern*

Jan 2024 – Jun 2024

- Developed REST APIs and React-based application workflows for a real-time application, integrating WebSockets for live updates and state synchronization.
- Implemented **JWT authentication, session management, and Google OAuth** for application access.

PROJECTS

SatyaMark | *Python, LangGraph, LangChain, RAG, Claude, Hugging Face, Redis Streams, PostgreSQL*

2025

- Built an open-source **multi-modal content verification platform** combining LLM-based fact-checking, RAG, web search, and AI image detection.
- Designed **LangGraph multi-stage workflows** for claim extraction, evidence retrieval, scoring, re-evaluation, and grounded verdict generation.
- Implemented Map-Reduce fact-checking to extract relevant evidence and produce evidence-based verification results.
- Built asynchronous AI processing using **Redis Streams**, worker architecture, retries, abandoned-job handling, and API failover.
- Published a reusable React SDK with **3.6K+ downloads** for streaming live verification results into applications.

Jobora | *Python, LangGraph, LangChain, Node.js, Redis, PostgreSQL, Puppeteer*

2026

- Built an **Agentic AI job automation platform** for job discovery, LLM-based analysis, candidate-job matching, and application automation.
- Designed **LangGraph workflows** for job discovery, candidate evaluation, and automated applications.
- Developed distributed pipelines using Python, Node.js, PostgreSQL, Redis, and browser automation.
- Built a React analytics dashboard for job eligibility, application status, matching insights, and job intelligence.

EDUCATION

Sinhgad College of Engineering, Pune | *B.E. Computer Engineering (CGPA: 8.18)*

2021 – 2024
