🔗 Portfolio

EDUCATION

Savitribai Phule Pune University

June 2024

Bachelor of Engineering in Computer Engineering

Current GPA: 8.15/10.0

PERSONAL SUMMARY

Software Developer | App Developer | Game Developer

Proficient in the **MERN stack** (MongoDB, Express, React, Node.js) and **Spring Boot**, with a strong understanding of **data structures** and **algorithms**. Experienced in **Unity** for game development and proficient in **C#, C++, and Java**. Having contributed to over **30** projects, I am focused on enhancing my skills in **Spring Technologies** and **React**, with a commitment to leadership and delivering high-quality projects on time.

Achievements:

- 2 Apps on the Play Store, with **10K+** and **100K+** downloads.
- **HackWithInfi Finalist**.

SKILLS

Languages: C/C++, C#, Java, (Basic), Python, HTML, CSS, JavaScript, TypeScript

Tools: MongoDB, Express, React, Node, React Native, Spring Boot, GraphQL, PWA, Unity, AR, VR, Netcode, Photon, Mirror, DOTS, Android Studio, Websockets, Azure, Git, Github, Gitlab, Figma

EXPERIENCE

Infosys | *Specialist Programmer*

August 2024 – Present

Working on the **MERN stack** (MongoDB, Express, React, Node.js), **React Native**, and **Spring Boot** to build and optimize scalable web and mobile applications. My role involves collaborating with cross-functional teams to design, implement, and maintain high-performance solutions, ensuring timely and efficient delivery. I am continuously enhancing my skills in modern technologies while contributing to innovative and impactful projects.

SaralTech | *Jr. Programmer*

January 2024 – June 2024

Working on the 100x betting app with a GO backend, featuring diverse gambling games. I manage Unity development, integrating AWS S3 for scalable storage, Websockets for low-latency real-time data from Mattermost, and RESTful APIs for seamless backend communication. Collaborated with teams for Agile development and continuous integration.

Godspeed Games | *Jr. Programmer*

February 2023 – September 2023

Developed a cross-platform AR app Carscan, worked payment gateways for seamless transactions. Also contributed to the development and debugging of the Xbox game Guns&Spurs 2, ensuring smooth gameplay by resolving various bugs.

PROJECTS

shopARound | *Unity, Android, C#, Photon, Photon Voice, AR, Git, VSCode*

July 2023

An AR-based shopping app developed with Unity, C#, Photon, and Photon Voice. It merges virtual and physical shopping through the Metaverse, allowing remote shopping for users and helping businesses expand their reach.

JJ3D | *Unity, DOTS, C#, Express, MongoDB, JWT, JavaScript, Websocket, Netcode, Microsoft Azure*

April 2024

Developing a multiplayer roguelike survival game featuring procedural world generation and game modes like Battle Royale, Survival, and Team Death Match. Using Unity with DOTS for high performance and multithreading, Node.js and Express for backend services, and MongoDB for data storage.

Wealthwise | *MongoDB, Express, React, Node Js, JWT, Charts.js, Graph.js, PDFMake, ExcelJS*

July 2023

An expense tracking app built with the MERN stack. It offers interactive charts, PDF/Excel report downloads, financial goal tracking, and personalized insights based on salary and savings. Users can manage their profiles for a customized experience.
