PERSONAL SUMMARY

Full Stack Developer with 1 year of experience specializing in the MERN stack. Proficient in modern React (Hooks, Redux Toolkit), backend development with Node.js, and secure authentication using JWT. Experienced in both NoSQL and relational databases, including PostgreSQL, with a strong focus on data modeling and API security. Skilled in building responsive UI/UX, optimizing performance, and delivering scalable end-to-end products. Contributed to apps with 160K+ downloads on the Play Store. HackWithInfy Finalist passionate about creating impactful, user-centric solutions.

SKILLS

Frontend: React, Redux Toolkit, Bootstrap, Tailwind CSS, Framer Motion, Reactbits, JavaScript (ES6+), TypeScript, HTML, CSS

Backend: Node.js, Express.js, MongoDB, PostgreSQL, REST APIs, WebSockets, JWT, Java, Spring Boot

Tools & Platforms: Git, GitHub, Cloudinary, Netlify, Vercel, Render, Neon, Postman, Agile/Scrum

EXPERIENCE

Infosys | *Specialist Programmer*

Aug 2024 – Present

- Worked on a production-level full-stack project using React.js, Node.js, Express.js, and PostgreSQL.
- Gained hands-on experience in building web applications with the MERN stack and integrating RESTful APIs.
- Implemented authentication flows using JWT and managed sessions efficiently using Redis.
- Explored to features like Progressive Web App (PWA) support and deep linking for better user experience.
- Improved frontend performance using Redux Toolkit, dynamic imports, and optimized styling with TailwindCSS.

SaraITech | *Jr. Programmer*

Jan 2024 – Jun 2024

- Primarily worked on creating responsive and user-friendly frontend interfaces for dynamic multi-user applications.
- Integrated Google OAuth2.0 authentication using Firebase for secure and seamless user login on the frontend.
- Connected RESTful APIs and WebSocket channels (via Mattermost) on the frontend to enable real-time data updates.
- Utilized AWS S3 to load only required assets on demand, improving frontend performance and data efficiency.

PROJECTS

FUSE

Jul 2025

- Developed a full-stack social media app using React (TypeScript), Node.js, Express, and PostgreSQL.
- Implemented category-based posting where users can post and explore content in predefined interest categories.
- Built a customizable feed system showing only posts relevant to the user's selected categories.
- Integrated real-time messaging using WebSocket (Socket.IO) with support for instant text and image sharing.
- Used Cloudinary for fast, scalable image uploads in both posts and chat.
- Designed a responsive, mobile-first UI with animations using Tailwind CSS and Framer Motion.
- Optimized performance with lazy loading, infinite scroll, and Redux Toolkit for state management.

Consent Management

Apr 2025

- Developed a role-based consent platform aligned with India's DPDP Act, 2023 using ReactJS and Spring Boot.
- Designed and implemented RESTful APIs with Spring Boot for secure, scalable backend services.
- Used React Router for dynamic routing and role-based access control across four types (User, Company, Consent Manager, Government).
- Implemented scalable frontend architecture using Redux Toolkit for centralized state management.

PocketMoney

May 2023

- Developed a job-matching platform for students to discover part-time and internship opportunities across domains.
- Built with React and Firebase for real-time database operations, user authentication, and job listing workflows.
- Implemented seeker-provider messaging via SMTP.js and dynamic job filters for role, location, and domain preferences.
- Focused on responsive UI/UX with form validations, route-based navigation, and optimized component architecture.
