SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Node.js, Express.js, REST APIs, gRPC, WebSockets

Databases & Cloud: PostgreSQL, MySQL, Redis, MongoDB, AWS, GCP

Tools & Concepts: Git, Docker, Jenkins (CI/CD), JUnit, Mockito, Microservices, System Design, OOP, Agentic AI, RAG, Text-to-SQL, RBAC

ACHIEVEMENTS

- Demonstrated advanced Data Structures & Algorithms proficiency by achieving **LeetCode Knight** (2,012 Rating), ranked in the top **2.45%** globally with **1K+** solved problems.
- Developed and shipped Android applications, achieving over **1.4M+ Play Store downloads**.
- Published open-source **npm libraries** with **4.6K+** downloads.
- Selected as a **HackWithInfy Finalist**, and one of 150 builders chosen from 5K+ applicants at **Push to Prod 2026**, an Anthropic Claude hackathon.

EXPERIENCE

Infosys | *Specialist Programmer – Software Development Engineer*

Aug 2024 – Present

- Architected scalable backend services and POCs using **Java, Spring Boot, REST APIs, and gRPC** to support decoupled **React micro-frontend** deployments.
- Optimized **MySQL queries** reducing API response times by **25%**, and integrated AWS/GCP services (S3, Cloud SQL, Redis) for configuration and data storage.
- Containerized **Spring Boot microservices** using **Docker**, automated deployments via **Jenkins CI/CD**, and ensured API reliability with **JUnit and Mockito**.
- Built a centralized **Agentic AI** knowledge base using RAG, LLM wikis, and OKF, featuring natural language database querying (Text-to-SQL) and strict role-based access control.
- Developed an AI-powered platform transforming meeting transcripts and videos into structured Process Design Documents, reducing creation time from hours to under 5 minutes.
- Built a React library to export complex dashboards into fully editable PPT and PDF documents, adopted across 7+ projects by 3 teams, reducing manual report creation from hours to one click.

SaralTech | *Software Engineer Intern*

Jan 2024 – Jun 2024

- Developed React UIs and implemented WebSockets, ensuring real-time state synchronization for 10K+ users.
- Integrated JWT authentication and session management workflows to strictly secure application access.

PROJECTS

Consent Management | *Java, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, React, TypeScript*

2025

- Built a full-stack role-based consent management platform aligned with India's **DPDP Act, 2023**.
- Developed backend REST APIs using **Java Spring Boot** with Controller-Service-Repository architecture.
- Implemented **Spring Security**, session-based authentication, and role-based access control across User, Company, Consent Manager, and Government roles.
- Managed consent lifecycle and audit operations using **Spring Data JPA and PostgreSQL**.

SatyaMark | *Python, Node.js, PostgreSQL, Redis Streams, WebSockets, LangGraph*

2025

- Built an open-source multi-modal content verification platform with distributed asynchronous workers.
- Designed data pipelines using **PostgreSQL, Redis Streams, WebSockets** with retries and API failover.
- Implemented processing workflows for claim extraction, evidence retrieval, scoring, and re-evaluation.
- Published a reusable React SDK with **3.6K+ downloads** for integrating live verification results.

EDUCATION

Sinhgad College of Engineering, Pune | *B.E. Computer Engineering (CGPA: 8.18)*

2021 – 2024
