PERSONAL SUMMARY

Full Stack Developer with 1 year of experience specializing in the MERN stack (MongoDB, Express.js, React, Node.js). Proficient in modern React (Hooks, Redux Toolkit, React Query), backend development with Node.js, and secure authentication using JWT. Skilled in building responsive UI/UX, optimizing performance, and delivering scalable end-to-end products. Contributed to apps with 160K+ downloads on the Play Store. HackWithInfy Finalist passionate about creating impactful, user-centric solutions.

SKILLS

Frontend: React, Redux Toolkit, React Query, Bootstrap, Tailwind CSS, Material UI, JavaScript (ES6+), TypeScript, HTML, CSS

Backend: Node.js, Express.js, MongoDB, PostgreSQL, REST APIs, WebSockets, JWT, gRPC, Java

Tools & Platforms: Git, GitHub, Netlify, Docker (basic), Postman, Azure (basic), Agile/Scrum

EXPERIENCE

Infosys | *Specialist Programmer*

Aug 2024 – Present

- Built and maintained scalable full-stack web apps using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Developed secure RESTful APIs with Express.js and PostgreSQL; implemented JWT authentication and role-based access.
- Enhanced frontend performance using React Query, Redux Toolkit, and code-splitting; styled with Material UI and TailwindCSS.
- Implemented Microfrontend architecture to enable modular development, independent deployment, and team-level ownership of features.
- Integrated third-party APIs using REST and gRPC, and added deep linking and SSL Pinning for secure app workflows.

SaraITech | *Jr. Programmer*

Jan 2024 – Jun 2024

- Built real-time backend modules using Node.js, Express.js, and WebSockets for dynamic data sync in multi-user apps.
- Implemented secure RESTful APIs with OAuth2.0 and Google Auth integration for authentication workflows.
- Worked on microservices architecture to improve scalability, modularization, and deployment flexibility.
- Integrated third-party APIs and used WebSocket channels (via Mattermost) for backend event communication.

PROJECTS

Consent Management

Apr 2025

- Developed a role-based consent platform aligned with India's DPDP Act, 2023 using ReactJS.
- Built responsive, accessible UIs using Bootstrap, and custom React components.
- Used React Router for dynamic routing and role-based access control across four user types (User, Company, Consent Manager, Government).
- Integrated React Query for efficient data fetching, caching, and synchronization with backend APIs.
- Optimized component performance using lazy loading, code-splitting, and state management with Redux Toolkit.

Wealthwise

Oct 2024

- Developed a personal finance management app using the MERN stack with secure JWT-based authentication.
- Implemented dynamic charts using Chart.js and Graph.js to visualize user spending patterns and trends.
- Enabled PDF and Excel export using PDFMake and ExcelJS; delivered personalized financial summaries via RESTful APIs.
- Focused on responsive UI, optimized React performance, and modular backend architecture with Express.js and MongoDB.

PocketMoney

May 2023

- Developed a job-matching platform for students to discover part-time and internship opportunities across domains.
- Built with React and Firebase for real-time database operations, user authentication, and job listing workflows.
- Implemented seeker-provider messaging via SMTP.js and dynamic job filters for role, location, and domain preferences.
- Focused on responsive UI/UX with form validations, route-based navigation, and optimized component architecture.
