SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL

Frameworks & Libraries: React, Node.js, Express.js, LangChain, LangGraph, Tailwind CSS

Databases & Cloud: MySQL, PostgreSQL, MongoDB, Redis, AWS, GCP, Cloudinary

Tools: Git, Docker, Jenkins (CI/CD), Webpack (Micro Frontends), REST APIs, WebSockets, Jest, Vitest

ACHIEVEMENTS

- Demonstrated advanced Data Structures & Algorithms (DSA) proficiency by achieving **LeetCode Knight** (1959 Rating), ranked in the top **3.2%** globally with **1K+** solved problems.
- Developed and shipped Android applications, achieving over **160K+ Play Store downloads**.
- Published **npm libraries** with **3.3K+** downloads, including **SatyaMark** and **PDF & PPT Export**.
- Selected as a **HackWithInfy Finalist** from a nationwide pool of thousands of participants.

EXPERIENCE

Infosys | *Specialist Programmer – Software Development Engineer*

Aug 2024 – Present

- Built a React library to export complex dashboards into fully editable PPT and PDF documents, adopted across 7+ projects by 3 teams, reducing manual report creation from hours to one click.
- Developed an AI-powered platform transforming meeting transcripts and videos into structured Process Design Documents, reducing creation time from hours to under 5 minutes.
- Led system design for micro-frontend applications using React and Webpack Module Federation.
- Optimized MySQL queries and implemented database indexing, reducing API response times by 25%.
- Integrated AWS (S3, Parameter Store) and GCP (Cloud SQL, Redis, Cloud Storage) for configuration management and data storage.

SaralTech | *Software Engineer Intern*

Jan 2024 – Jun 2024

- Developed React UIs and implemented WebSockets, ensuring real-time state synchronization for 10K+ users.
- Integrated JWT authentication and session management workflows to strictly secure application access.

PROJECTS

SatyaMark | *Python, LangGraph, LangChain, React, WebSockets, Node.js, Redis, PostgreSQL*

2025

- Built an open-source multi-modal content verification platform combining LLM-based fact-checking (RAG) and AI image detection.
- Developed distributed verification pipelines using Python, Node.js, Redis Streams, and WebSockets to orchestrate independent AI workers and stream live results.
- Implemented multi-stage LLM workflows for claim extraction, evidence retrieval, scoring, and re-evaluation to improve verification reliability.
- Published a reusable React SDK (**satyamark-react**) with **2.2K+ downloads**, enabling integration of live verification signals into third-party applications.

Jobora | *Python, LangGraph, LangChain, React, TypeScript, Node.js, Redis, PostgreSQL*

2026

- Built an Agentic AI job automation platform that discovers jobs across multiple platforms, evaluates candidate fit using LLMs, and automatically applies to eligible roles.
- Developed browser automation pipelines using Puppeteer to scrape job postings and submit applications.
- Designed a distributed processing pipeline with Node.js, Python, PostgreSQL, Redis, and LangGraph to clean, structure, and evaluate job data.
- Built a React-based analytics dashboard to track eligible opportunities, application status, and job insights through interactive visualizations.

EDUCATION

Sinhgad College of Engineering, Pune | *B.E. Computer Engineering (CGPA: 8.18)*

2021 – 2024
