EDUCATION

Savitribai Phule Pune University

June 2024

Bachelor of Engineering in Computer Engineering

Current GPA: 8.15/10.0

PERSONAL SUMMARY

Software Developer

Proficient in the **MERN stack** (MongoDB, Express, React, Node.js) and **Spring Boot**, with a strong understanding of **data structures** and **algorithms**. Experienced in **Unity** for game development and proficient in **C#, C++, and Java**. Having contributed to over **20+** projects.

Achievements:

- 2 Apps on the Play Store, with **10K+** and **100K+** downloads.
- **HackWithInfi Finalist**.

SKILLS

Languages: C/C++, C#, Java, Python (Basic), HTML, CSS, JavaScript (JS), TypeScript (TS)

Tools: MongoDB, Express, React, Node, React Native, Spring Boot, SQL, Postgresql, GraphQL, PWA, Bootstrap, AdMob, AppLovin, Facebook Audience Network (FAN), Ad mediation, ironSource, UnityAds, Unity, AR, VR, Netcode, Photon, Mirror, DOTs, Android Studio, Websockets, Azure, Git, Github, Gitlab, Figma

EXPERIENCE

Infosys | *Specialist Programmer*

August 2024 – Present

Hands-on experience with **MERN stack**, **Spring Boot microservices**, **React Native**, and **React.js** for scalable web and mobile applications. Expertise in **PWA** development, **gRPC**, and **JWT authentication**. Built secure **RESTful APIs** with **PostgreSQL** integration, and applied **Spring Security**. Optimized frontend with **Redux Toolkit**, **React Query**, **code-splitting**, and styled with **Material UI**, **TailwindCSS**, and **CSS-in-JS**. Enhanced app security with **SSL Pinning** and **deep linking**, and improved performance with **cache mechanisms** (Redis, Memcached). Implemented **API rate limiting**, third-party **API integrations**, and **accessibility** improvements.

SaralTech | *Jr. Programmer*

January 2024 – June 2024

Developed RMG applications using **AWS**, **WebSockets**, and real-time data synchronization for scalable performance. Integrated **Unity Addressables** with **AWS S3** for asset management and optimized **API integrations** with third-party services. Implemented **RESTful APIs**, secure **OAuth2.0** and **Google Auth** for authentication. Used **Mattermost** with **WebSocket** for data handling and backend communication. Leveraged **microservices architecture** to enhance scalability and deployment efficiency.

Godspeed Games | *Jr. Programmer*

February 2023 – September 2023

Optimized performance and fixed bugs in **Guns&Spurs 2** for Xbox One/Series S, enhancing game stability and user experience. Developed **CarScan AR** for Android/iOS, improving UI/UX design, API integration with **Firebase**, and performance optimizations. Implemented real-time data synchronization and push notifications.

PROJECTS

Consent Management | *Spring Boot, ReactJS, PostgreSQL, REST APIs, Java, SQL*

April 2025

Developed a full-stack Consent Management System compliant with India's DPDP Act, 2023.

Implemented features for different roles: **Data Principal (User)**: Manages personal data, providing consent and requests for access, correction, and deletion. **Data Fiduciary (Company/App)**: Collects and processes data, ensuring usage as per user consent, and implements data security. **Consent Manager**: A central system to manage consents across multiple platforms. **Data Protection Board**: Government body ensuring compliance, handling breach reports, and conducting investigations.

Wealthwise | *MongoDB, Express, React, Node Js, JWT, Charts.js, Graph.js, PDFMake, ExcelJS*

July 2023

An expense tracking app built using the MERN stack. Features include interactive charts, PDF/Excel report downloads, financial goal tracking, and personalized insights based on income and savings. Users can manage their profiles for a tailored experience, making it easier to visualize and optimize their financial health.

shopARound | *Unity, Android, C#, Photon, Photon Voice, AR, Git, VSCode*

July 2023

An AR-based shopping app it merges virtual and physical shopping through the Metaverse, allowing remote shopping for users and helping businesses expand their reach. Multiple users can connect and interact within the same virtual shopping environment, with a proximity-based voice chat feature enabling real-time communication based on user location.
