PERSONAL SUMMARY

Full Stack Developer with 1 year of experience specializing in the MERN stack. Proficient in modern React (Hooks, Redux Toolkit), backend development with Node.js, and secure authentication using JWT. Experienced in both NoSQL and relational databases, including PostgreSQL, with a strong focus on data modeling and API security. Skilled in building responsive UI/UX, optimizing performance, and delivering scalable end-to-end products. Contributed to apps with 160K+ downloads on the Play Store. HackWithInfy Finalist passionate about creating impactful, user-centric solutions.

SKILLS

Frontend: React, Redux Toolkit, Bootstrap, Tailwind CSS, Framer Motion, Reactbits, JavaScript (ES6+), TypeScript, HTML, CSS

Backend: Node.js, Express.js, REST APIs, WebSockets, Socket.IO, JWT, OAuth 2.0, Java

Databases: MongoDB, SQL, PostgreSQL, Redis

Tools & Platforms: Git, GitHub, Cloudinary, Netlify, Vercel, Render, Neon, Postman, Agile/Scrum

EXPERIENCE

Infosys | *Specialist Programmer (Full Stack Developer)* Aug 2024 – Present

- Implemented full-stack features that enhanced application stability and reduced bug occurrences.
- Integrated RESTful APIs with 99.9% uptime, reducing backend response time by 25% and improving efficiency.
- Used Redis caching to improve API data retrieval efficiency, reducing response times by 35%.
- Optimized frontend performance by 40%, reducing average page load time from 3.5s to 2.1s via Redux Toolkit, dynamic imports, and TailwindCSS styling.

SaralTech | *Jr. Programmer (Frontend Developer)* Jan 2024 – Jun 2024

- Designed responsive, user-friendly interfaces for a multi-user platform, improving UI load speed by 20%.
- Integrated Google OAuth 2.0 authentication with Firebase, increasing login success rate by 25%.
- Enabled < 200ms real-time updates by integrating RESTful APIs and WebSocket channels (via Mattermost).
- Implemented AWS S3 on-demand asset loading, reducing bandwidth usage by 35% and improving asset load times.

PROJECTS

FUSE Jul 2025

- Developed a full-stack social media app using React (TypeScript), Node.js, Express, and PostgreSQL, architected to handle 1,000+ concurrent connections during testing.
- Implemented category-based posting and filtering, reducing irrelevant feed content by 60% in internal usability tests.
- Built a customizable feed system that increased average session duration by 20% in local testing scenarios.
- Integrated real-time messaging with WebSockets (Socket.IO), achieving under 300ms message delivery.
- Optimized Cloudinary image uploads, reducing average upload times from 2.5s to 1.5s during benchmark tests.
- Designed a mobile-first, responsive UI with Tailwind CSS, verified to display correctly on 25+ device viewports.
- Improved client-side rendering speed by 30% through lazy loading, infinite scroll, and Redux Toolkit.

Consent Management Apr 2025

- Developed a role-based consent management platform aligned with India's DPDP Act, 2023, ensuring 100% compliance across four distinct user roles.
- Engineered Spring Boot RESTful APIs with 200ms average response time, supporting high-volume concurrent requests.
- Implemented React Router navigation and role-based access control, reducing unauthorized access attempts by 40%.
- Optimized frontend architecture with Redux Toolkit, improving state management efficiency by 25%.

PocketMoney May 2023

- Developed a job-matching platform prototype for students using React and Firebase, featuring real-time database updates with sub-150ms fetch times in local testing.
- Designed dynamic job filters for role, location, and domain, returning accurate results in under 200ms.
- Implemented seeker-provider messaging via SMTP.js, enabling email delivery with an average send time of 1.2s.
